TECHNORA CREWS !!

SITE SCAN

Smart insights, quick actions, transparent outcomes

Problem

- Citizens daily face **common issues** like
 - 🚧 **Damaged Roads** 🗑️ **Overflowing dustbins**
 - 💡 **Streetlights** 💧 **Water**
- Complaints often **unreported or delayed**
- No proper tracking → **low trust in authorities.**
- Leads to **frustration, inefficiency, and lack of trust** in authorities

Proposed Solution

- ✓ 📱 **Scan QR** → Complaint with photo/video
- ✓ 🏠 **Auto-routing + Dashboard** → Right dept + fast action on reports
- ✓ 📊 **Live Status Board** → Shows solved & unsolved reports publicly
- ✓ ✅ **Proof & Alerts** → Citizen gets notified proof of issue resolved

TECHNICAL APPROACH

Technologies used:

- ❑  **Frontend:** HTML,CSS,JS
- ❑  **Backend:** DBMS (SQL), Node JS
- ❑  **APIs:** Live location (GPS)

Methodology:

- ❑  **QR-based reporting:**
QR redirect to portal for complaint
- ❑  **Real-time tracking:**
Public can see real-time status of complaint
- ❑  **Analytics Dashboard:**
Scanning **Next time** show the **status of previous** report and **add** new complaint
- ❑  **Proof-based resolution:** Authorities act, upload **valid proof**, and **notify** the reporter → builds citizen trust

- 01 Citizen Submits Issue
- 02 System Tags Location & Category
- 03 Issue Routed to Department
- 04 Admin Updates Status
- 05 Citizen Receives Notifications
- 06 Dashboard Generates Analytics

Auto Routs

Resolution

Proof Of Resolved

EXISTING V/S OUR SOLUTION

 Site Scan	 Existing govt portals (Ex:iPGRS)
 Very easy and quick to report an issue — simple , modern, and user-friendly .	 Lengthy and complicated process; need to fill many unnecessary details.
 Automatically detects location using GPS — no manual entry needed.	 Users must manually enter district, taluk, and pincode every time.
 Supports geo-tagged images and videos as proof with time & location.	 No geo-tag support — just text-based complaint form.
 Shows live nearby issues on an interactive Google Map .	 No map view — users cannot see or verify nearby complaints.
 Gives real-time dashboard & live project tracking for transparency.	 Only shows basic complaint status — no real-time monitoring .

IMPACT AND BENEFITS

TECHNORA CREWS !!

Impact

Benefits

Citizens

No more **office visits** -
just **scan QR** to file
complaints, saving **time**
& effort

Receive **notifications**
with verified **proof**
of issue solved

Government

Showing **solved &**
pending cases publicly
creates the **pressure** on
admin to resolve

Reduce **manual**
workload over time

Community

Builds stronger **trust**
between **govt &**
citizens.

Boosts issue-
solving & **minimizes**
problems.

Feasibility And Viability

TECHNORA CREWS !!

Feasibility :

- ✓ **Low-cost** cloud database maintenance
- ✓ **Scalable** for multimedia/users
- ✓ Quick **QR-Scan**-based deployment

Viability:

- ✓ **Govt-aligned** –Fits smart cities & digital india vision
- ✓ **High Adoption Potential** – Simple QR-scan encourages citizen participation
- ✓ **Dual-purpose QR:** Works as both complaint system & publicity tool
- ✓ **Tender-linked QR loop:** New QR after each tender ensures long-term continuity.
